COMMENTS
- We have technological experience in Epoxies, Urethanes, Marine Coatings and Mastics and would like to identify a product or group of products that we can initially distribute, then manufacture locally under license, joint venture or royalty payment. The item(s) would be of proven experience in the offshore and we would wish to increase the Canadian content of the raw materials if possible. We are prepared to set up the required stringent quality control and assurance programs in order to satisfy the offshore end user.
